Von Routledge : Changing University Teaching: Reflections on Creating Educational Technologies (Open and Flexible Learning Series) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Changing University Teaching: Reflections on Creating Educational Technologies (Open and Flexible Learning Series):

Kundenrezensionen Hilfreichste Kundenrezensionen 0 von 0 Kunden fanden die folgende Rezension hilfreich. Recommended for university boards, administrators faculty. Von Midwest Book Review Changing University Teaching: Reflections On Creating Educational Technologies presents a diverse range of ideas, opinions and practical

information on the implementation and effect of communication and information technologies in the field of collegiate education. Educators and researchers Terry Evans and Daryl Nation collaborate in considering how these changes can improve teaching, how the university enterprise itself is changing, and address issues of concern for the practical process and effects of developing educational technologies. Changing University Teaching is very highly recommended reading for university boards, administrators, faculty, and education technology research students.

Kurzbeschreibung Behind the hype of the "virtual university" lies real change in the way practitioners approach university teaching. This book focuses on the changes to teaching both on and off campus that have either come from, or themselves influenced the development of educational technologies. Pressestimmen. ". this volume is a compelling, thought-provoking, well organized series of articles which all speak to the possibilities inherent in the changes confronting university teachers while illuminating some of the challenges for teachers and students alike." -- British Journal of Educational Technology Kurzbeschreibung Behind the hype of the "virtual university" lies real change in the way practitioners approach university teaching. This book focuses on the changes to teaching both on and off campus that have either come from, or themselves influenced the development of educational technologies.
