(Spanish) football Von Neil Cranswick A great read about following a team for the fun of watching football, not due to a sense of obligation. Brings the region to life, with small history lessons built into each town he visits. A highly recommended read!

Kurzbeschreibung During the 2013-14 season Anthony Higgins followed fan owned club CAP Ciudad de Murcia, in the fifth tier of Spanish football. Tired of the excesses of the modern game and in an attempt to rediscover his mojo for the sport, the author goes on the road visiting every corner of the Spanish Region of Murcia and beyond. On his travels he discovers the clubs links with other fan groups throughout Spain and further afield which then takes him on journeys to places as diverse as Bilbao and Gibraltar. En-route he pays a different kind of visit to some of Spains hidden pearls. This is a highly personal account of one persons relationship with a country, its people, its history and ultimately its alternative football scene. The book combines the pleasures of travel writing with a profound scrutiny of Spanish life seen through the eyes of an exile from Tyneside and of course its all played out to a backdrop of football.
