Bittersweet story about a girl struggeling to find home Von S. BrummI loved this story as it shows some of the problems a foster kid has when having to find home. And home does not always mean the family you are born into.The story is written in a bittersweet way where you get to feel the emotions and eventually pain of Alli, the 14

year old girl, who tries to keep up the image of a healthy functioning family with her twin siblings and her mother, despite having to deal with problems far beyond her capability.

KurzbeschreibungWish you could find great books for middle grade readers that dont cost a fortune?Looking for good tween books that you cant put down? Then try...HOMEA gripping tale of one girls fight to get out of foster care and to reunite her family.Its Allies 14th birthday, and shes in her 17th foster home. Suck it up, her mom says. Play the game and theyll let you come home. And Allie is great at the gameat lying about her moms drinking, at hiding the weird things her little brother does that worry social workers, at pretending the counseling is actually helping. Allie is so great at the game that she never has to stay in a foster home more than three months. Now Allie has a problem: Her newest foster family has caught on to her game. They see right through her lies, and theyre trying to stop her from going back home. Ever. Yet the last place Allie wants to live is on a smelly old farm in the middle of nowhere. But how do you fight it when everyone around you is saying that where you were born isnt where you belong?HOME is a touching tale about a girl struggling to reunite her family, protect her young siblings, and gain control of her lifeall in the face of family problems that no one believes she can fix.A Personal Note From The Author:The reality is that even kids who have terrible home lives would rather live with their own families than be taken away and put in foster care. Youd think kids would be happier living in a stable environment where theyre well fed, protected from harm and treated with respect. Its not true. Most kids want to go home, and theyll lie about the neglect and abuse, and hide anything that might make social workers suspicious, in order to get back to their families. I fosteredand then adoptedfour children, and I faced this struggle with every one of them. Its heartbreaking to watch kids try to convince everyoneincluding themselves that their birth families can somehow be normal. If youre on the look-out for good books for girls, middle grade readers or young teens, or tween books on kindle, then this ones for you.Want to read more?
