Von Courtney L. Zietzke : Mercury: The Winged Messenger (English Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Mercury: The Winged Messenger (English Edition):

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Lead Dipped Tipped Wings of MercuryVon BeatleBangs1964Between David Kirby's sterling book, "Evidence of Harm," Stephanie Marohn's book entitled "The Natural Medicie Guide to Autism," we now have this book to add to the growing body of literature about the possible causal link mercury may have to autism. In fact, Marohn's book PREDATES Kirby's work! So does autism pioneer Dr. Rimland, who has long beseached those powers that be to look into this possible tie-in.Many publications including "Rolling Stone," "Time" as well as many national newspapers and

magazines have run articles about mercury and autism. Many town meetings have been held in re mercury, thimerosal and autism. In recent years, studies have been conducted about determining that link. At present, there does appear to be a strong positive correlation between mercury and autism. A recent study that has been conducted in Boston has determined that blood among people with autism is different from that of neurotypical (NT) counterparts. Lead and mercury has been found in large amounts in the hair and blood of people with autism. Marohn talks about this in her book and about chelation treatment which is used to correct this. On May 6, 2005 an article in the local paper reported how a study in Boston has determined that there is a difference in immune systems in the autistic and neurotypical (NT) populations. People with autism were shown to have 20% more immune cells and over 100 blood proteins also showed differences. Dr. David Amaral of UC-Davis said that the brains of people with autism show an increase in B-cells and natural killer cells. According to him, this indicates an autoimmune condition. At the time of this review, it is too early to prove that the Boston and California studies are conclusive. Amaral and his team have said they are on the cutting edge of bioresearch and detecting neuromarkers in autism. They also feel there is a causal relationship between mercury in autism. In India and Indonesia, there has been an increase in autism. Recent studies have shown large amounts of lead and arsenic in people's hair and blood. That does not sound coincidental at all. Changes in the environment, such as increased traffic; air pollutants and the vaccinations are at the top of the short list of possible causes. It is shocking and upsetting that people were told that meetings about the pharmaceutical companies' role in this are to be "kept confidential." I don't see how it CAN be a confidential matter with the number of people with autism are increasing! Robert Kennedy, Jr., who is an environmental lawyer and former disc jockey-now TV talk host Don Imus have joined forces to confront pharmaceutical companies about whether or not there IS a causal link between mercury-thimerosal and autism. Kennedy, long an environmentalist has banged on the drum for years about cleaning the PCBs and mercury out of New York's famous Hudson River because fish were ingesting these substances. People in turn were eating the fish. The entire food chain was being adversely affected by this. Kirby has appeared on Imus' talk show as well as others. On August 7, 2005 he was interviewed by Tim Russert and he, together with RFK, Jr. cited their sources. Kirby said that in the 1980s, one in every 10,000 children had autism; those figures have jumped in the last 20 years to 1 in every 2500. SCARY! Thimerosal is no longer used in the state of California. Autism has SIGNIFICANTLY DROPPED in the state of California. Coincidence? I DON'T THINK SO! Nearly half of the thimerosal preservative for vaccinations is mercury! The EPA has determined in very recent years that children who have received vaccinations in recent years have received far in excess of the legal safety limit. The Environmental Protection Agency is aware of this and RFK, Jr. is actively involved with this organization as well. Too bad there doesn't yet exist a bumper sticker that says "I'm/We're autistic and I/We vote!" A September 2003 article in "Newsweek" discusses the rise in autism including a family with three sons, two of whom have autism. The parents claim that the two sons developed normally until they were vaccinated. This was in 2003 that this article was written! Many presses seem reluctant to touch this very serious issue as well as acknowledge the recent studies and reports. The sad thing is, as Imus pointed out, there seems to be a real fear of reprisal from the pharmaceutical companies. Kirby has said repeatedly that the cruelest irony of all is that the very people who depend on those pharmaceutical companies and who have entrusted their children's health to those companies are the ones now paying the piper with the rise in autism. It's long past time this information was made available to the world at large and hopefully class action suits will be brought against the pharmaceutical companies. Sadly, the laws seem more angled towards protecting the pharmaceutical companies than providing protection for people with autism and seeing that preventive measures are conducted to ensure that substances that cause autism are being used. The 3-year Statute of Limitations is calculated to protect those pharmaceutical companies instead of placing the rights, interests and needs for those directly affected first. WHY? Special interests have indeed obstructed the legal vision of justice and all at the citizen taxpayers' cost. People with autism deserve the same rights and protection. There are many adults with autism who are taxpaying voters. Their rights, interests and needs are also covered under the same legal umbrella that the NT world has benefitted/profited from. There has to be a way to stop letting the Federal Government to act as enablers to the pharmaceutical corporations by continuing to pass the buck of autism onto the taxpayers while ensuring the pharmaceutical industry reaps the billions in profits. Autism is a serious matter. A very serious matter. It is a neurobiological condition that affects sensory integration and processing as well as communication. It can range from very severe, such as Kanner's autism and there are many people with Kanner's autism who are nonverbal and unable to live independently. Care and provisions have to be made for their needs. This is all currently being done at the taxpayers' expense. Since the pharmaceutical companies are concerned with profits, just think of the money they will save in providing lifetime services to people with severe forms autism if such a link can be proved, prevented and corrected. Think of the money that is needed to maintain good support services and intervention programs for people with autism of all ages. It would be in the pharmaceutical companies' monetary interest to look into this since money seems to be their main concern. There are many people with autism that is moderate to mild, such as Asperger's. It is the adult population with Asperger's (people with autism who got off easy) who vote; pay taxes; marry; own property and are actively involved in these investigations. It is the adult population with Asperger's who, working alongside NT counterparts are banging on the drum about this and trying to force the government/pharmaceutical hand to do

something about this. As RFK Jr., Imus and Kirby have been saying all along, if there is OR is not a causal link, then those pharmaceutical companies are honor bound to conduct impartial tests with accurate reporting and disclose same to the public.

Kurzbeschreibung "This book will begin to answer questions about what many will eventually call the worst medical tragedy in modern medical history. The corrupt political system that has tried to protect and cover up the facts about this atrocity has only begun to show its evil face. This book tries to answer questions about why Autism has exploded into a national epidemic. This national tragedy could have and should have been avoided. These afflicted children need help. The establishment(s) that caused this tragedy have been unsympathetic, evasive and full of legal denials. This book deals with the truth and will anger many people as a result. Mercury is one of nature's most toxic poisons. Why was this poison intentionally injected into our children--?"

den Autor und weitere Mitwirkende Mr Courtney Zietzke is a 42 year old financial accountant from Seattle, WA. Over the last three years Mr. Zietzke has done extensive research into the causes of what many call "Autism." His opinions in this book are substantiated with proven facts and direct uncontested evidence. Mr. Zietzke like thousands of concerned parents wanted answers into what went wrong and most importantly why did this national tragedy have to happen.
