and efficient path to successfully enhance your Chinese language skills Von Florian Hochenrieder I study the Chinese language since a few years after I participated in my first Chinese course while my MBA studies. Since this time I practiced it in several courses with different types of learning material with various focus and different experiences. I stuck to "Modern Chinese - Learn Chinese in a Simple and Successful Way" from Miss Zhang after discovering it on a business trip to London by coincidence. I stuck to it while the flight and also while practicing my vocabulary in the evening and was very positively surprised. It keeps its promise and is smart, simple and very good. And even as fast learner you don't get bored :-). The four books are methodically and didactically well organized and follow an intelligent path to build up the relevant basics in Chinese step by step. Man man lai. The foundations of pinyin and Chinese grammar are built up step by step with well chosen examples and a smart approach to digest the most important issues of each chapter. Intelligent holistic path to basic Chinese. Especially for structured and strategic learners who follow a Pareto approach (20/80) to gather quick results the four books are the right choice. You will find yourself in a natural flow through the chapters to repeat your status quo and to build up your portfolio of Chinese vocabulary and grammar in effective manner. No waste and unnecessary parts who would bore you out. Book 1 is focused on pronunciation, pinyin basics and essential grammar topics like time, numbers, adjectives and measuring. Book 2 dives deep on verbs, adverbs and common phrases while enhancing the grammar basic knowledge in continuous way. Book 3 is my favorite at the moment with its priority on daily life issues from food, work, family and other important situation. This book is very well designed to inhale a small talk repertoire. Best to fresh up your skills before interaction with Chinese people. Book 4 rounds up the concept of Miss Zhang with enriching the first three books with more daily life topics and especially with important Chinese cultural aspects from names, festivals, food, animal signs to martial arts (Gong Fu/Tai Chi). If you are also very interested in cultural facets of China or practice Asian martial arts like me, you will like the fourth book to upgrade your portfolio of Chinese small talk topics in inspiring ways. You did a fine job, Miss Zhang, and your book let me grow. Xie xie ni and best regards from London. Tai hao le! 0 von 0 Kunden fanden die folgende Rezension hilfreich. Comprehensive teaching materials perfectly adjusted for daily Chinese teaching Von Echs I've seen a lot of Chinese learning materials. And to be honest I was not often happy with them. These 4 books, however, are the perfect basis to not only learn basic Chinese but also improve your Chinese gradually and constantly to an advanced level. I had a lot of fun working with these books and the gradual increase in complexity regarding vocabulary and grammar was just right for me - steady and challenging but not too steep. Book 1 is the perfect entry for any ambitious beginner. It absolutely matches the needs of Western learners.

Kurzbeschreibung In recent years, China has grown to be a powerhouse in the world economy. Mandarin, Putonghua in Chinese, has always been the world's most spoken language by sheer volume of native speakers but its value has also become especially important among foreigners and business professionals. With the ever increasing focus on international trade with China, Western interest in learning Chinese has grown exponentially. As a Chinese native speaker fluent in English, I have been translating, interpreting and teaching for many years. I have not always been satisfied with the available books and materials for teaching Chinese to foreigners. Over the last several years I have tried, tested and perfected various lessons and techniques that apply well to Chinese studies. I have collected and now publish all of these modern techniques into books. One of the unique features in these books is the literal translation into English of common Chinese expressions and vocabulary. For example, you can often see lit. with the daily life topic sentences in BOOK 2, showing the direct translation of the Chinese text. This will reinforce an understanding of sentence structure and grammar which has proven to be instrumental in helping you retain the Chinese you have already learned. Other Chinese language books do not use this approach. In BOOK 2, Part 1 provides more grammar points which continue from BOOK 1. There are useful examples to help you grasp each of the grammar points. Part 1 is arranged in such a way that any topic in this part can be studied independently. Upon completion of this book, you will attain not only mastery of Chinese grammar and vocabulary, but also an expanded knowledge of Chinese writing. NOTE: After you have learnt Pinyin (initials, finals and tones) in Part 1 of BOOK 1, you are ready to continue studying any of the books within the Modern Chinese series BOOK 1, 2, 3 and 4. In 2010, Vivienne decided to fully dedicate herself to teaching Chinese language to foreign expats employed at those same multi-national companies where she worked as an interpreter before. In 2012, based on the success of her teaching, Vivienne wrote a series of books that teach Chinese using her unique learning methods. These techniques have become very popular among her students and readers.
