**Von John F. Welch, Lewis Bjork, Linda Bjork : Van Sickle's Modern Airmanship** before purchasing it in order to gage whether or not it would be worth my time, and all praised Van Sickle's Modern Airmanship:

KundenrezensionenHilfreichste Kundenrezensionen0 von 1 Kunden fanden die folgende Rezension hilfreich. By Myron W. CollierVon Myron W. CollierI have not had an opportunity to review the eight edition of Neil D. Van

Sickle's "Modern Airmanship," but I can state unequivocally it is a first class publication. I was privileged to have contributed to several chapters of a previous edition and, thereby, know the accuracy and quality that goes into this book. Myron W. Collier

Kurzbeschreibung The ultimate and standard aviation encyclopedia for 43 years. Modern Airmanship covers every subject from aerodynamics, to emergency and survival techniques, to airplane and aerospace structures. It is also the preeminent "how-to" source for all aviation professionals. The Eight Edition, lavishly illustrated, includes the latest information on federal regulations and technical advances. From the theory of flight, airplane and aerospace structures to high performance aircraft and weather, this book covers every topic related to the aviation industry.

Kurzbeschreibung The ultimate and standard aviation encyclopedia for 43 years. Modern Airmanship covers every subject from aerodynamics, to emergency and survival techniques, to airplane and aerospace structures. It is also the preeminent "how-to" source for all aviation professionals. The Eight Edition, lavishly illustrated, includes the latest information on federal regulations and technical advances. From the theory of flight, airplane and aerospace structures to high performance aircraft and weather, this book covers every topic related to the aviation industry.

Synopsis Both a how-to- and an encyclopedic reference, this book has long been considered the ultimate source of information for pilots of all skill levels and professionals across the aviation discipline. The 8th edition of "Van Sickle's Modern Airmanship" reflects the accelerating changes in aviation with updated and new information including data and discussion relevant to the increasing impact and new directions of aviation globally, economically, and privately, booming use of computers in aviation from individual level to aircraft design and flight itself (i.e., training, internet, nav aids, airline and airport operations, automated cockpit, etc.). It covers New aircraft, new engines, new avionics, and new techniques. A new chapter examines Sport Aviation including hand gliding, gliding, soaring, parachuting, and ballooning. Forecast chapter includes detailed discussion of upcoming new National Air Space Architecture, Free Flight, GPS exclusively, and identifies trends on the leading edge.
