Tomorrow's world todayVon RobinI've always had a passion for the NY world's Fair and I thought Fie's book would be a worthy edition to the few books I have about the Fair.I was very impressed with the visual look of the book and

the way Fies used different graphic techniques to make the story come alive. For instance: * The use of fourteen photos showing the attractions of the Fair with our hero Buddy and dad added to them but as comic art. * The four comics, which are integral to the story, are printed on comic-style paper and a really nice touch, I thought, is the first one from 1939 uses a rather coarse screen to reproduce the art with last comic, from 1975, using a much finer looking screen. The 1939 comic also has poor registration and printers blemishes, no doubt typical of down-market printing back then. * Fies cleverly uses photos, color space art (by Chesley Bonestell) a few stills from a Buck Rogers serial and some Second World War posters to provide extra interest in his panels. * Lots of visual historical references like the GM Fururama pavilion at the Fair, a 1960s Florida diner interior or a motel that you might see at Wildwood, NJ. Buddy helps in the wartime paper drives and one frame shows his neatly tied paper contribution thrown into a truck and landing on a stack of print and just visible amongst the discarded paper you can just a bit of the first issue of Action Comics (no wonder the first issue is worth a fortune). * The clever die-cut cover which shows Buddy and dad crossing the street in 1939 and under that, in exactly the position, both of them a shown in the future. It's difficult to fault the graphics of the book but I did find one error (probably of judgment). The four comics are complete with covers, inside front cover ads, credible small type imprints at the bottom of the first comic page but two of them have no back covers even though you can see Buddy reading them and the back cover ads are clearly visible. The 1955 one is an ad for a six foot long rocket ship (a bargain at \$4.98) and the one for 1965 is one of those Famous Artist School ones with either Albert Dorne or Norm Rockwell replaced by an older looking Buddy at the art desk. OK, a couple of minor errors that fortunately shouldn't spoil your enjoyment of lovely graphic novel.

Kurzbeschreibung Whatever Happened to the World of Tomorrow?, the long-awaited follow-up to Mom's Cancer, is a unique graphic novel that tells the story of a young boy and his relationship with his father. Spanning the period from the 1939 New York World's Fair to the last Apollo space mission in 1975, it is told through the eyes of a boy as he grows up in an era that was optimistic and ambitious, fueled by industry, engines, electricity, rockets, and the atom bomb. An insightful look at relationships and the promise of the future, award-winning author Brian Fies presents his story in a way that only comics and graphic novels can. Interspersed with the comic book adventures of Commander Cap Crater (created by Fies to mirror the styles of the comics and the time periods he is depicting), and mixing art and historical photographs, this groundbreaking graphic novel is a lively trip through a half century of technological evolution. It is also a perceptive look at the changing moods of our nation-and the enduring promise of the future. Pressestimmen "The clean, simple comic-strip quality of Fies's art fits the story perfectly, highlighting the gravity of the situation while cutting away undue sentimentality. Mom's Cancer is a quiet, courageous account of one family's response to a universal situation." - Publishers Weekly starred review.
