about Christ's church and its growth and health. This book explores the core values absolutely necessary for reformation of the body of Christ in this day and age. A simplified "how to" book that is easily fit to your situation and location. What Christianity was always meant to be but hardly ever gets to... and why! Simple, profound, insightful and deep cutting... it will either have you pounding your desk with agreement or running scared. Not for the faint-hearted, nor for those without a true love for the church. WARNING: if you try to implement these ideas in your church it will likely result in your crucifixion... or at least excommunication. "if you follow me you will be treated as I am treated"

Ralph Neighbour hits the nail on the head with this 488 page powerhouse of a book. Sharing his personal pilgrimage out of the traditional church and into what he terms "basic Christian community" (the cell-based church), Neighbour clearly describes the problems with the current structure and contrasts it to a New Testament lifestyle and the values necessary to make every believer a minister.
