Schlechte BildqualittVon -KundeSehr enttuschende Bildqualitt, was vermutlich am Druck und nicht an den Bildern selbst liegt. Wirklich schade, denn auf Twitter sahen die Bilder toll aus. Ich wrde davon abraten das Buch zu kaufen.0 von 0 Kunden fanden die folgende Rezension hilfreich. Die Welt aus einem anderen WinkelVon Florian RichterViele wirklich schne und beeindruckende Bilder mit interessanten Texten und Hintergrundinformationen. Die Bildqualitt ist gut fr Bilder die bei sehr hoher Entfernung und Geschwindigkeit gemacht wurden, jedoch kenne ich nicht die Twitterbilder habe deswegen keinen einfachen Vergleich. Hat sehr viel Spass gemacht zu lesen besonders zusammen mit der Familie zu Weihnachten.Das Buch ist schnell durchgelesen aber ich denke man wird noch fter mal reinschauen oder es Freunden zeigen.1 von 4 Kunden fanden die folgende Rezension hilfreich. EnttuschungVon hanna braunsebook ist enttuschend. Die Bilder sind klein und lassen sich nicht vergern, auf dem Tablet kaum zu erkennen. Das gebundene Buch mag vielleicht besser sein.JB

KurzbeschreibungIn *You Are Here*, celebrated astronaut Chris Hadfield gives us the really big picture: this is our home, as seen from space. The millions of us who followed Hadfield's news-making Twitter feed from the International Space Station thought we knew what we were looking at when we first saw his photos. But we may have caught the beauty and missed the full meaning. Now, through photographs - many of which have never been shared - Hadfield unveils a fresh and insightful look at our planet. He sees astonishing detail and importance in these images, not just because he's spent months in space but because his in-depth knowledge of geology, geography and meteorology allows him to reveal the photos' mysteries. Featuring Hadfield's favourite images, *You Are Here* is divided by continent and represents one (idealized) orbit of the ISS. Surprising, thought-provoking and visually delightful, it opens a singular window on our planet, using remarkable photographs to illuminate the history and consequences of human settlement, the magnificence of never-before-noticed landscapes, and the power of the natural forces shaping our world and the future of our species.

PressestimmenOne of Space.com's Best Space Photography Books "Is there a person left on the internet who hasn't yet swooned over astronaut Chris Hadfield's jaw-dropping images from space? Here's a chance to have them in your home.... While we've seen plenty of NASA images of our planet, Hadfield's instantly feel more personal. These photos were taken by a curious human, not as part of a larger organizational mandate. Hadfield was capturing his photos not necessarily as a scientist, but more as a zero-gravity sightseer on behalf of all civilization." Alissa Walker, Gizmodo "You Are Here ... offers readers a magnificent photographic view of something very familiar: Earth." Sarah Gray, Salon "Awe-inspiring photos... Sprinkled among the pictures are Hadfield's fun factoids about life without gravity." Parade "A photographic exploration of the planet, a series of spectacular images snapped from the International Space Station." David Martindale, Dallas Morning News "Eye-opening and often whimsical." John McMurtrie, Houston Chronicle "A visually stunning tour of Earth.... Breathtaking photos." CBS This Morning "A stunning book of photos." Alyssa Newcomb, ABC News "Fun and fascinating." A sure hit for fans of photography, cartography, geography or space travel." Wendy Sawatzky, Winnipeg Free Press "The book is incredibly well designed, with a visually interesting mix of typography and layouts.... It is sure to capture the attention of adults and kids, and evoke a sense of wonder about our beautiful but slightly banged up rock we call home." Ariane Coffin, GeekMom "The photos "offer fascinatingly unfamiliar perspectives on Venice, the Sahara desert, Australia's sparsely populated interior, and the oil and gas sites of New Mexico." Henry Hitchings, Wall Street Journal "This planetary photo tour-surprising, playful, thought-provoking, and visually delightful-is also punctuated with fun, fascinating commentary on life in zero gravity.... *You are Here* opens a singular window on our planet, using remarkable photographs to illuminate the history and consequences of human settlement, the magnificence of newly uncovered landscapes, and the power of the natural forces shaping our world and the future of our species."
